

Engineered RIGHT, Built RIGHT, Installed RIGHT, Serviced RIGHT - by BRIGHT

72" W x 34' L Enclosed Conveyor for Cardboard

CUSTOM CONVEYORS

- Custom length and widths
- Direct drive
- Cleated belt conveyors up to 45 degree angles
- Folding conveyors
- U-trough or flat belt
- Enclosed or open designs
- Stainless steel frame and rolls options

Bright Technologies custom designs belt conveyors for a variety of unique applications. All our conveyors are direct drive to the pulley with not cumbersome belt or chain guards necessary. Many of our conveyors use modular sectional frames so the conveyor length can be changed if the location or conditions change.

Folding 36" W x 21" L Dewatered Sludge Conveyor

U-trough type conveyor folds for transportation and sets up in minutes. These conveyors feature an active belt alignment system, which is also designed to reduce sludge build up on the return and steering rollers.

- Direct drive
- Active belt alignment
- Custom lengths and widths
- Manual winch for fold and unfold

45 Degree Incline Beverage Metering Conveyor

- Heavy duty construction
- Direct Drive
- Stainless steel construction
- 1 Cubic meter hopper
- Custom lengths and widths

This conveyor is designed to transport and meter full liquid product containers into our recycling products. The stainless steel construction and sealed designed returns liquids from ruptured containers to an SS liquid collection sump. These conveyors are angled 45 degrees and use a 3 inch cleated belt which saves space and facilitates a steady average product flow. This type design has also been used to carry other small items and documents for compaction or production destruction.

Sealed U-trough Conveyor with Counterweight Discharge Doors

- Direct drive
- Custom length and widths
- Lowers building heat loss
- Counter weight discharge doors
- Heavy duty stainless steel construction

This conveyor is designed to lower heat loss when material is conveyed inside to outside of a building. The conveyor features counterweighted discharge doors that open when material is deposited by the conveyor and close after the material has dropped off the doors. The belly pan has poly-carbonate windows that can be removed for wash down and cleaning.

Hydraulic Folding Discharge Conveyor

This conveyor is designed to fold vertically to save space in transportation. Hydraulic cylinders are used to fold and unfold the conveyor as well as adjust the discharge angle. When folded this conveyor take up a minimum of valuable floor space in this mobile dewatering system. The conveyor and complete mobile dewatering system was designed and manufactured by Bright Technologies.

- Folds upon itself for minimum footprint
- Heavy duty stainless steel construction
- Adjustable discharge angle

Working together to provide complete recycling and wet waste processing solutions
